Electric workbench with drawer, 1200 x 800 mm

Ergonomic - Economic – Adjustable

Ref.: N103000-1200x800

AN ADJUSTABLE AND ECONOMIC WORKBENCH

This workbench offers optimal user comfort. Its relatively big height adjustment range enables you to select the most comfortable position.

The worktop height is electrically adjustable. It can be configured between 620 and 1250 mm using the control. It has 3 stored heights, making it very simple to restore comfortable working positions.

This workbench is perfectly suited to operations not requiring robustness and high stability. Its relatively lightweight design makes it unsuitable for placing heavy loads.

ERGONOMICS

TechniWatch offers a solution for eliminating musculo-skeletal disorders (MSD) in your workshops, by offering an adjustable workstation that enables the operator to work at an ergonomic height and easily switch between seated and standing positions. In addition, all the necessary tools and components are within easy reach to facilitate the operator's work.

MODULARITY

This workstation is designed to easily meet your needs thanks to its modularity, which makes it ideal for a "lean manufacturing" or "5S" approach. We can offer a range of accessories enabling you to customise your workstation according to your preferences and the specific requirements of your working environment.

PRODUCTIVITY

It is undeniable that this workstation's enhanced ergonomics improve productivity and limit absenteeism. In other words, by optimising your workstations, you can save precious time and maximise your operators' efficiency.

Technical specifications:

- Quick assembly (between 30 and 60 mins)
- Capacity for a uniformly distributed load: 100 kg
- Maximum speed: 38 mm/s
- Power supply 230V
- Telescopic height 620 to 1250 mm
- Light grey melamine worktop, 1200 x 800 x 25 mm. Black ABS edges
- Overload safety system

Contents:

- N103000-1200x800 – Electric workbench with drawer, 100 kg max.

Electric workbench with drawer, 1200 x 800 mm

Product details

APPLICATIONS:

- **LIGHT PRODUCTION WORK**
- **INSPECTION BENCHES**
- **OFFICE**
- **OTHER WORKSTATION TYPES**

Saving stored positions:

1. Use the arrows ▼ (lower worktop) and ▲ (raise worktop) to adjust the height to a suitable level. At the same time you will see the height in mm instantly appear on the digital display.
2. To save the desired position, press **M**, and then stored pos. **1**, **2** or **3**. If you change the height, you can retrieve the saved position by pressing on the number of the previous stored position.
3. You can save 3 stored positions.

Selecting the worktop raising / lowering speed:

To adjust the speed, press button **A**, and then adjust the speed using the ▲ and ▼ arrows. The maximum speed is 35 mm/s.

Dimensions:

Worktop dimensions: 1200 x 800 mm
Leg dimensions: 1100 x 750 mm
Min. / max. height: 620 / 1250 mm

Weight:

58 kg

Reference:

N103000-1200x800

Advantages:

- Economic
- Ergonomic
- Adjustable
- Stored comfort positions
- Easy to clean
- Limited footprint
- Optional accessories

Servicing advice:

- Clean the worktop with a wet cloth or an alcohol wipe

Electric workbench with drawer, 1200 x 800 mm

Accessories

We can look into fitting accessories on the electric workbench.
